Empathy Map Canvas:

User Persona

Primary User: Customer (Passenger)

Age Group: 18–60 years

Occupation: Student, Employee, Business Professional, Tourist

Goal: Book a safe, affordable, and reliable cab quickly.

SAYS

"I need a cab immediately."

"I want to know the fare before booking."

"I hope the payment process is secure."

"I need to reach my destination quickly."

"I want to track my driver."

THINKS

"Will the driver arrive on time?"

"Is this ride safe?"

"Can I trust this driver?"

"I don't want my booking to be cancelled."

"I hope the app is easy to use."

DOES

Searches available cabs.

Compares fares.

Books rides online.

Tracks the driver's location.

Makes online payments.

Rates and reviews the driver.

FEELS

Happy when booking is confirmed quickly.

Anxious while waiting for the driver.

Frustrated if no cabs are available.

Confident when ride tracking works correctly.

Satisfied after completing a safe trip.

Secure when payment is successful.

Pain Points

- Difficulty finding nearby available cabs.
- Long waiting times.

- Unclear fare estimates.
 - Ride cancellations.
 - Poor internet connectivity affecting bookings.
 - Lack of accurate real-time tracking.
 - Limited payment options.
 - Safety concerns while traveling.
-

User Needs

- Quick cab booking.
 - Accurate fare estimation.
 - Real-time driver tracking.
 - Secure login and authentication.
 - Multiple online payment options.
 - Easy cancellation and refund process.
 - Booking history.
 - Reliable customer support.
 - Safe and comfortable travel experience.
-

Gains (Expected Benefits)

- Faster ride booking.
 - Reduced waiting time.
 - Secure online payments.
 - Live GPS tracking.
 - Transparent pricing.
 - Better user experience.
 - Easy booking management.
 - Improved customer satisfaction.
-

Empathy Map Summary

The primary users of the **Cab Booking System** expect a fast, secure, and convenient way to book transportation. They value accurate fare estimates, real-time driver tracking, secure

digital payments, and a simple user interface. Addressing these needs helps improve customer satisfaction while making ride management more efficient for both passengers and service providers.
