

User Acceptance Testing (UAT) Template

Date	26 JULY 2026
Team ID	
Project Name	CAB BOOKING
Maximum Marks	

Project Overview:

Project Name: CAB BOOKING

Project Description:

The **Cab Booking System** is a web application developed using the **MERN Stack (MongoDB, Express.js, React.js, and Node.js)**. It allows users to register, log in, search for available cabs, book rides, track drivers, make online payments, and view booking history.

The system has three types of users: **Customer**, **Driver**, and **Admin**. Customers can book cabs, drivers can accept ride requests, and the admin can manage users, drivers, vehicles, and bookings.

The main objective of this project is to provide a **fast, secure, and user-friendly** platform for online cab booking. It reduces manual work, improves ride management, and offers a better travel experience through features like real-time tracking, secure authentication, and responsive design.

Project Version: v1.0

Testing Period: 6 JULY 2026 to 25 JULY 2026

Testing Scope:

List of Features and Functionalities to be Tested

The following features and functionalities of the Cab Booking System will be tested:

- User Registration
- User Login and Logout
- Driver Registration and Login
- Admin Login
- JWT Authentication and Authorization
- User Profile Management
- Driver Profile Management
- Search Available Cabs
- Cab Booking
- Fare Estimation

- Ride Confirmation
 - Real-Time Ride Tracking
 - Booking History
 - Online Payment Processing
 - Payment Confirmation
 - Driver Ride Acceptance and Completion
 - Admin Dashboard
 - User Management
 - Driver Management
 - Vehicle Management
 - Booking Management
 - Responsive User Interface
 - Error Handling and Input Validation
-

List of User Stories or Requirements to be Tested

- As a customer, I can create a new account.
- As a customer, I can log in using valid credentials.
- As a customer, I can search for available cabs.
- As a customer, I can view fare estimates before booking.
- As a customer, I can book a cab successfully.
- As a customer, I can track my ride in real time.
- As a customer, I can make secure online payments.
- As a customer, I can view my booking history.
- As a driver, I can register and log in to the system.
- As a driver, I can receive and accept ride requests.
- As a driver, I can update the ride status.
- As an administrator, I can manage users, drivers, vehicles, and bookings.
- As an administrator, I can monitor system activities through the admin dashboard.
- The system should validate user inputs and display appropriate error messages.
- The system should restrict unauthorized users from accessing protected pages.
- The application should function correctly on desktop, tablet, and mobile devices.

Testing Environment:

URL/Location:

Frontend: http://localhost:5173 (React Application)

Backend API: http://localhost:5000 (Node.js/Express Server)

Credentials (if required)

Customer Login

- **Username/Email:** user@example.com
- **Password:** User@123

Driver Login

- **Username/Email:** driver@example.com
- **Password:** Driver@123

Admin Login

- **Username/Email:** admin@example.com
- **Password:** Admin@123

Test Cases:

D	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	User Registration	1. Open Registration page.2. Enter valid details.3. Click Register.	User account is created successfully.	Account created successfully.	Pass
TC-002	User Login	1. Open Login page.2. Enter valid email and password.3. Click Login.	User is logged in and redirected to Dashboard.	Login successful.	Pass
TC-003	Search Available Cabs	1. Enter pickup and drop locations.2. Click Search.	List of available cabs is displayed.	Available cabs displayed correctly.	Pass
TC-004	Book a Cab	1. Select a cab.2. Confirm booking.3. Submit booking.	Booking confirmation is displayed.	Booking completed successfully.	Pass
TC-005	Online Payment	1. Select payment method.2. Complete payment.3. Confirm transaction.	Payment is processed successfully.	Payment completed successfully.	Pass
TC-	View Booking	1. Login.2. Open Booking	Previous bookings	Booking history displayed	Pass

D	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
006	History	History.	are displayed.	correctly.	
TC-007	Driver Accept Ride	1. Driver logs in.2. Accept ride request.	Ride status changes to Accepted.	Ride accepted successfully.	Pass
TC-008	Admin Login	1. Enter admin credentials.2. Click Login.	Admin dashboard opens successfully.	Dashboard displayed successfully.	Pass
TC-009	Invalid Login	1. Enter incorrect credentials.2. Click Login.	Error message is displayed.	Appropriate error message displayed.	Pass
TC-010	Unauthorized Access	1. Access protected page without login.	Access denied and redirected to login page.	Access denied successfully.	Pass

Bug Tracking:

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	No critical bugs were identified during testing.	N/A	Low	Closed	Application is functioning correctly.

Sign-off:

Signature: K.L.Satyasri

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
